Technical Unit members approve new Boeing contract!

SEATTLE – SPEEA Technical Unit members have approved a new contract with The Boeing Company!

Ballots counted at SPEEA headquarters Tuesday (April 28) show more than 74% of the voting members approved the agreement that keeps Technical workers aligned with their engineering counterparts and runs to Oct. 6, 2026. The final tally shows 2,483 members voting to “Accept” and 847 voting to “Reject.”

The vote was a revote of the Boeing contract offer after information in the original voting package drew complaints because of its clarity. A complete contract [redline](#) and [summary sheet](#) are available on the SPEEA website.
